

Gianmarco Ottaviano joins the *Journal of Regional Science* Editorial Team

Gianmarco I.P. Ottaviano has joined Marlon Boarnet, Steven Brakman, and Mark Partridge as co-editor of the *Journal of Regional Science*.

Ottaviano is Professor of Economics at Bocconi University Milan. He received his BA in Economics at Bocconi University, his M.Sc. in Economics at the London School of Economics and Political Science, and his Ph.D. in Economics at the Université Catholique de Louvain. He was Associate Professor of Economics at Bocconi University and Full Professor of Economics at the University of Bologna before moving again to Bocconi University as Full Professor of Economics since 2008. He is research fellow of CEPR London in the International Trade Program and Regional Economics, non-resident senior fellow of Bruegel Brussels and fellow of FEEM Milan. He is the co-author of many works in international trade, urban economics and economic geography, including “Economic Geography and Public Policy” (*Princeton University Press*, 2003), “Agglomeration and trade revisited” (*International Economic Review*, 2002), “Agglomeration and economic geography” (*Handbook of Regional Science and Urban Economics*, 2004), “The economic value of cultural diversity: Evidence from US cities” (*Journal of Economic Geography*, 2006), “Market size, trade and productivity” (*Review of Economic Studies*, 2008). He is on the editorial boards of the *Journal of Economic Geography*, the *Journal of Urban Economics*, and *Regional Science and Urban Economics*. His website is: <http://faculty.unibocconi.eu/gianmarcoottaviano/>.

Since 1958, the *Journal of Regional Science* has been the premier outlet for regional science scholarship. The journal publishes original analytical research at the intersection of economics and quantitative geography. This includes rigorous methodological contributions and seminal theoretical pieces. The *JRS* is one of the most highly cited journals in urban and regional research, planning, geography, and the environment. The *JRS* publishes work that advances our understanding of the geographic dimensions of urban and regional economies, human settlements, and policies related to cities and regions. Articles appearing in recent issues cover the full span of topics within regional science, and submissions on all regional science topics are welcomed.
